MENS CLASSIC JERSEY

This is a template for the mens Classic jersey on <http://www.endura.me> size extra small.

DESIGN GUIDE - DOCUMENT LAYERS

Guides Layer: Identifies the panels on the garment, their orientation and the correct orientation for text.

Endura Logos Layer: Contains endura.me logos. Designers are required to keep at least one but are free to change their color, increase their size and alter their position.

Marks Layer:

- **Inner Mark:** Panel artwork area. Your jersey will be stitched along these lines. This is the your artwork area.

- **Mid Mark:** Panel cut mark. Fabric is cut larger to allow to seams.

- **Outer Mark:** Bleed Mark. Ensure that your artwork extends all the way to this line.

Artwork Layer: This is the layer for your artwork. We've included an extra copy of the outer marks of each panel. They are there for your convenience and are not required for production. Use them to set a background color for a panel or mask artwork.

Base Layer: This is the layer containing this information. Please do not hide when uploading as it is used in the rendering process for some designs.

All layers can be left visible. Only the Logos and Artwork layer are used while rendering.

ARTWORK TIPS

Blacks: When working with greyscale shades, use pure blacks. For example, CMYK(0,0,0,100).

Colours: For best results try to use CMYK colours with a total value not exceeding 240. CMYK(100,100,40,0) = 240. Colours above 240 print "wet" and can lead to bleeding in the final print. sdafsadf
